Note on Orders

Orders provide near-term perspective on the company's outlook, particularly when viewed in the context of prior and future quarterly order rates. However, orders are not in themselves an indication of future performance. All comparisons are at constant currency exchange rates, with the prior year restated to the current-year rates. All exclude acquisitions until they can be reflected in both the numerator and denominator. Aerospace comparisons are rolling 12-month average computations. The total Parker orders number is derived from a weighted average of the year-over-year quarterly % change in orders for Diversified Industrial North America and Diversified Industrial International, and the year-over-year 12-month rolling average of orders for the Aerospace Systems Segment.

Note on Net Income

Net Income referenced in this press release is equal to net income attributable to common shareholders.

Note on Non-GAAP Numbers

This press release contains references to (a) earnings per share without the effect of business realignment charges, CLARCOR costs to achieve, gain (loss) on sale and writedown of assets, net and U.S. Tax Reform one-time impact, net, (b) segment operating margins without the effect of business realignment charges and CLARCOR costs to achieve; (c) the effect of business realignment charges, CLARCOR costs to achieve and U.S. Tax Reform income tax expense adjustment on forecasted earnings from continuing operations per share; (d) and cash flows from operations without the effect of discretionary pension contributions. The effects of business realignment charges, CLARCOR costs to achieve, gain (loss) on sales and writedown of asset, net, U.S. Tax Reform one-time impact, net and discretionary pension contributions are removed to allow investors and the company to meaningfully evaluate changes in earnings per share, segment operating margins and cash flows from operations on a comparable basis from period to period. This press release also contains references to EBITDA and adjusted EBITDA. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA before business realignment charges, CLARCOR costs to achieve, and gain (loss) on sale and writedown of assets, net. Although EBITDA and Adjusted EBITDA are not measures of performance calculated in accordance with GAAP, we believe that it is useful to an investor in evaluating the results of this quarter versus the prior period.
