PARKER-HANNIFIN CORPORATION
BUSINESS SEGMENT INFORMATION
(Dollars in thousands)
(Unaudited)

The Company operates in two reportable business segments: Diversified Industrial and Aerospace Systems.

Diversified Industrial - This segment produces a broad range of motion-control and fluid systems and components used in all kinds of manufacturing, packaging, processing, transportation, mobile construction, refrigeration and air conditioning, agricultural and military machinery and equipment and has a significant portion of international operations. Sales are made directly to major original equipment manufacturers (OEMs) and through a broad distribution network to smaller OEMs and the aftermarket.

Aerospace Systems - This segment designs and manufactures products and provides aftermarket support for commercial, business jet, military and general aviation aircraft, missile and spacecraft markets. The Aerospace Systems Segment provides a full range of systems and components for hydraulic, pneumatic and fuel applications.

PARKER-HANNIFIN CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Dollars in thousands, except per share amounts

1. Management representation

In the opinion of the management of the Company, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the Company's financial position as of March 31, 2018, the results of operations for the three and nine months ended March 31, 2018 and 2017 and cash flows for the nine months then ended. These financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company's 2017 Annual Report on Form 10-K. Interim period results are not necessarily indicative of the results to be expected for the full fiscal year.

The Company has evaluated subsequent events that have occurred through the date these financial statements were issued. In April 2018, the Company completed the divestiture of certain of its aerospace filtration businesses, which were part of the Diversified Industrial Segment. The operating results and net assets of the businesses divested were immaterial to the Company's consolidated results of operations and financial position. The Company expects to recognize an after-tax loss on the divestiture of approximately \$48 million during the fourth quarter of fiscal 2018. A significant portion of the loss is attributable to tax expense resulting from a tax gain recognized with this transaction.

2. New Accounting Pronouncements

In February 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-02, "Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income." ASU 2018-02 allows for a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the U.S. Tax Cuts and Jobs Act (TCJ Act) reduction of the U.S. federal corporate income tax rate. The amendments also require certain disclosures about stranded tax effects. ASU 2018-02 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted in any period after the issuance of the update. The amendments in this update should be applied either in the period of adoption or retrospectively to each period in which the effect of the change in the U.S. federal corporate income tax rate in the TCJ Act is recognized. The Company has not yet determined the effect that ASU 2018-02 will have on its financial statements.

In August 2017, the FASB issued ASU 2017-12, "Targeted Improvements to Accounting for Hedging Activities." ASU 2017-12 provides targeted improvements to Topic 815 accounting for hedging activities by expanding an entity's ability to hedge non-financial and financial risk components and reduce complexity in fair value hedges of interest rate risk. The guidance eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item. The guidance also eases certain documentation and assessment requirements and modifies the accounting for components excluded from the assessment of hedge effectiveness. ASU 2017-12 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early application is permitted in any interim period after issuance of the update. ASU 2017-12 should be applied using a modified retrospective approach for cash flow and net investment hedge relationships that exist on the date of adoption, and prospectively for presentation and disclosure requirements. The Company has not yet determined the effect that ASU 2017-12 will have on its financial statements.

In May 2017, the FASB issued ASU 2017-09, "Scope of Modification Accounting." ASU 2017-09 provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. An entity should account for the effects of a modification unless all of the following are met: (1) the fair value of the modified award is the same as fair value of the original award; (2) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; and (3) the classification of the award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified. ASU 2017-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted. ASU 2017-09 should be applied prospectively to an award modified on or after the adoption date. During the first quarter of fiscal 2018, the Company adopted ASU 2017-09. The adoption of ASU 2017-09 did not affect the Company's financial statements as there were no modifications of any share-based awards during the first nine months of fiscal 2018.

2. New Accounting Pronouncements, cont'd

In March 2017, the FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost." ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented. ASU 2017-07 also provides that only the service cost component is eligible for capitalization, when applicable. ASU 2017-07 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted as of the beginning of an annual period for which financial statements (interim or annual) have not been issued. ASU 2017-07 should be applied retrospectively for the income statement presentation of net periodic pension cost and net periodic postretirement benefit cost and prospectively, on or after the effective date, for the capitalization of the service cost component of net periodic pension cost and net periodic postretirement benefit cost. The Company has not yet determined the effect that ASU 2017-07 will have on its financial statements.

In January 2017, the FASB issued ASU 2017-04, "Simplifying the Test for Goodwill Impairment." ASU 2017-04 eliminates Step 2 from the goodwill impairment test. Under the amendments in this Update, an entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. ASU 2017-04 also eliminates the requirement for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. ASU 2017-04 is effective for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted. During the first quarter of fiscal 2018, the Company adopted ASU 2017-04. The adoption of ASU 2017-04 did not affect the Company's financial statements as there were no instances of a reporting units carrying value exceeding its fair value for any goodwill impairment tests performed during the first nine months of fiscal 2018.

In October 2016, the FASB issued ASU 2016-16, "Intra-Entity Transfers of Assets Other Than Inventory." ASU 2016-16 provides that an entity should recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Consequently, the amendments in ASU 2016-16 eliminate the exception for an intra-entity transfer of an asset other than inventory. ASU 2016-16 is effective for fiscal years, and interim periods within those years, beginning after December 31, 2017. Early adoption is permitted. The Company currently estimates that the adoption of ASU 2016-16 will eliminate a \$58 million income tax deferred charge recorded in the Consolidated Balance Sheet as of March 31, 2018.

In August 2016, the FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments." ASU 2016-15 provides specific guidance on several cash flow classification issues to reduce diversity in practice in how certain transactions are classified within the statement of cash flows. ASU 2016-15 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017 and should be applied using a retrospective transition method to each period presented. Early adoption is permitted. The Company has not yet determined the effect that ASU 2016-15 will have on its financial statements.

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments." ASU 2016-13 requires a financial asset (or a group of financial assets) measured at amortized cost to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. Credit losses relating to available-for-sale debt securities should be recorded through an allowance for credit losses. ASU 2016-13 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2019. Early adoption is permitted. The Company has not yet determined the effect that ASU 2016-13 will have on its financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases." ASU 2016-02 requires lessees to put most leases on their balance sheet by recognizing a liability to make lease payments and an asset representing their right to use the asset during the lease term. Lessee recognition, measurement, and presentation of expenses and cash flows will not change significantly from existing guidance. Lessor accounting is also largely unchanged from existing guidance. ASU 2016-02 requires qualitative and quantitative disclosures that provide information about the amount, timing, and uncertainty of cash flows arising from leases. ASU 2016-02 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company has not yet determined the effect that ASU 2016-02 will have on its financial statements.

In January 2016, the FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Liabilities." ASU 2016-01 requires equity investments (excluding equity method investments and investments that are consolidated) to be measured at fair value with changes in fair value recognized in net income. Equity investments that do not have a readily determinable fair value may be measured at cost, adjusted for impairment and observable price changes. The ASU also simplifies the impairment assessment of equity investments, eliminates the disclosure of the assumptions used to estimate the

2. New Accounting Pronouncements, cont'd

fair value that is required to be disclosed for financial instruments measured at cost on the balance sheet and requires the exit price to be used when measuring fair value of financial instruments for disclosure purposes. Under ASU 2016-01, changes in fair value (resulting from instrument-specific credit risk) will be presented separately in other comprehensive income for liabilities measured using the fair value option and financial assets and liabilities will be presented separately by measurement category and type either on the balance sheet or in the financial statement disclosures. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The Company has not yet determined the effect that ASU 2016-01 will have on its financial statements.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers." ASU 2014-09 requires revenue recognition to depict the transfer of goods or services to customers in an amount that reflects the consideration that a company expects to be entitled to in exchange for the goods or services. To achieve this principle, a company must apply five steps including identifying the contract with a customer, identifying the performance obligations in the contract, determining the transaction price, allocating the transaction price to the performance obligations, and recognizing revenue when (or as) the company satisfies the performance obligations. Additional quantitative and qualitative disclosure to enhance the understanding about the nature, amount, timing, and uncertainty of revenue and cash flows is also required. ASU 2014-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. In April 2016, the FASB issued ASU 2016-10, "Identifying Performance Obligations and Licensing." ASU 2016-10 clarifies the following two aspects of ASU 2014-09: identifying performance obligations and licensing implementation guidance. The effective date of ASU 2016-10 is the same as the effective date of ASU 2014-09. The Company currently anticipates using the modified retrospective method to adopt ASU 2014-09. The Company is still in the process of quantifying the impact of the adoption of ASU 2014-09, but at this time the Company does not expect the adoption to have a material impact on its financial statements.

For the three months ended March 31, 2018 and 2017, 197,560 and 717 common shares subject to equity-based awards, respectively, were excluded from the computation of diluted earnings per share because the effect of their exercise would be anti-dilutive. For the nine months ended March 31, 2018 and 2017, 471,008 and 1,608,245 common shares subject to equity-based awards, respectively, were excluded from the computation of diluted earnings per share because the effect of their exercise would be anti-dilutive.

4. Share repurchase program

The Company has a program to repurchase its common shares. On October 22, 2014, the Board of Directors of the Company approved an increase in the overall number of shares authorized for repurchase under the program so that, beginning on such date, the aggregate number of shares authorized for repurchase was 35 million. There is no limitation on the number of shares that can be repurchased in a fiscal year. There is no expiration date for this program. Repurchases may be funded primarily from operating cash flows and commercial paper borrowings and the shares are initially held as treasury shares. During the three-month period ended March 31, 2018, the Company repurchased 263,179 shares at an average price, including commissions, of \$189.98 per share. During the nine-month period ended March 31, 2018, the Company repurchased 839,717 at an average price, including commissions, of \$178.63 per share.

5. Trade accounts receivable, net

Trade accounts receivable are initially recorded at their net collectible amount and are generally recorded at the time the revenue from the sales transaction is recorded. Receivables are written off to bad debt primarily when, in the judgment of the Company, the receivable is deemed to be uncollectible due to the insolvency of the debtor. Allowance for doubtful accounts was \$10,879 and \$14,336 at March 31, 2018 and June 30, 2017, respectively.

6. Non-trade and notes receivable

The non-trade and notes receivable caption in the Consolidated Balance Sheet is comprised of the following components:

	March 31, 2018	June 30, 2017
Notes receivable	\$ 163,814	\$ 118,351
Accounts receivable, other	164,297	136,636
Total	<u>\$ 328,111</u>	<u>\$ 254,987</u>

7. Inventories

The inventories caption in the Consolidated Balance Sheet is comprised of the following components:

	March 31, 2018	June 30, 2017
Finished products	\$ 719,902	\$ 642,788
Work in process	811,898	723,133
Raw materials	200,959	183,573
Total	<u>\$ 1,732,759</u>	<u>\$ 1,549,494</u>

8. Business realignment charges

The Company incurred business realignment charges in fiscal 2018 and fiscal 2017. The Company also incurred acquisition integration costs in fiscal 2018 related to the fiscal 2017 acquisition of CLARCOR, Inc.

Business realignment charges and acquisition integration costs presented in the Business Segment Information are as follows:

	Three Months Ended		Nine Months Ended	
	March 31,		March 31,	
	2018	2017	2018	2017
Diversified Industrial	\$ 15,643	\$ 14,605	\$ 53,590	\$ 32,164
Aerospace Systems	1,815	1,713	3,270	2,796

Work force reductions in connection with such business realignment charges and acquisition integration costs in the Business Segment Information are as follows:

	Three Months Ended		Nine Months Ended	
	March 31,		March 31,	
	2018	2017	2018	2017
Diversified Industrial	110	312	1,375	642
Aerospace Systems	65	52	121	89

The business realignment charges primarily consist of severance costs related to actions taken under the Company's simplification initiative aimed at reducing organizational and process complexity, as well as plant closures, with the majority of the charges incurred in Europe and North America. The Company believes the realignment actions will positively impact future results of operations but will not have a material effect on liquidity and sources and uses of capital.

The business realignment charges and acquisition integration costs are presented in the Consolidated Statement of Income as follows:

	Three Months Ended		Nine Months Ended	
	March 31,		March 31,	
	2018	2017	2018	2017
Cost of sales	\$ 9,511	\$ 10,342	\$ 32,283	\$ 24,968
Selling, general and administrative expenses	7,723	5,976	24,353	9,992
Other (income), net	224	—	224	—

As of March 31, 2018, approximately \$23 million in severance payments had been made relating to business realignment charges incurred during fiscal 2018, the remainder of which are expected to be paid by March 31, 2019. Severance payments relating to prior-year business realignment actions are being made as required. Remaining severance payments related to current-year and prior-year business realignment actions of approximately \$27 million are primarily reflected within the other accrued liabilities caption in the Consolidated Balance Sheet. Additional charges may be recognized in future periods related to the business realignment actions described above, the timing and amount of which are not known at this time.

9. Equity

Changes in equity for the three months ended March 31, 2018 and 2017 are as follows:

10. Goodwill and intangible assets

The changes in the carrying amount of goodwill for the nine months ended March 31, 2018 are as follows:

	Diversified Industrial Segment	Aerospace Systems Segment	Total
Balance at June 30, 2017	\$ 5,488,236	\$ 98,642	\$ 5,586,878

Balance at March 31, 2018	<u>\$ 5,647,693</u>	<u>\$ 98,665</u>	<u>\$ 5,746,358</u>

Acquisitions represent adjustments to purchase price allocations during the measurement period subsequent to the applicable acquisition dates. The impact of purchase price allocation adjustments made during the first nine months of fiscal 2018 on the Company's results of operations and financial position were immaterial.

Intangible assets are amortized on the straight-line method over their legal or estimated useful lives. The following summarizes the gross carrying value and accumulated amortization for each major category of intangible assets:

	March 31, 2018		June 30, 2017	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Patents	\$ 269,935	\$ 116,041	\$ 254,049	\$ 100,860

Total	<u>\$ 3,393,902</u>	<u>\$ 1,259,243</u>	<u>\$ 3,374,723</u>	<u>\$ 1,067,239</u>

Total intangible amortization expense for the nine months ended March 31, 2018 was \$167,317. The estimated amortization expense for the five years ending June 30, 2018 through 2022 is \$215,358, \$205,011, \$196,150, \$187,346 and \$151,183, respectively.

Intangible assets are evaluated for impairment whenever events or circumstances indicate that the undiscounted net cash flows to be generated by their use over their expected useful lives and eventual disposition may be less than their net carrying value. No such events or circumstances occurred during the nine months ended March 31, 2018.

11. Retirement benefits

Net pension benefit cost recognized included the following components:

	Three Months Ended		Nine Months Ended	
	March 31,		March 31,

Net pension benefit cost	<u>\$ 30,158</u>	<u>\$ 50,397</u>	<u>\$ 92,531</u>	<u>\$ 150,568</u>

During the three months ended March 31, 2018 and 2017, the Company recognized \$(100) and \$1,034, respectively, in (income) expense related to other postretirement benefits. During the nine months ended March 31, 2018 and 2017, the Company recognized \$2,080 and \$3,266, respectively, in expense related to other postretirement benefits.

12. Income taxes

On December 22, 2017, the TCJ Act was enacted into law. The TCJ Act significantly reforms the Internal Revenue Code of 1986, as amended, by among other things, establishing a flat corporate income tax rate of 21 percent and creating a territorial tax system (with a one-time transition tax imposed on previously unremitted foreign earnings and profits).

The Securities and Exchange Commission staff issued Staff Accounting Bulletin 118 ("SAB 118"), which provides guidance on accounting for the tax effects of the TCJ Act. SAB 118 provides a measurement period that should not extend beyond one year from the TCJ Act's enactment date for companies to complete the applicable accounting under Topic 740. In accordance with SAB 118, and based on the information available as of December 31, 2017, the Company recorded a net provisional discrete income tax cost of \$225 million as a result of the TCJ Act being enacted during the second quarter of fiscal 2018.

The reduction in the U.S. corporate tax rate under the TCJ Act required a one-time revaluation of certain tax-related assets and liabilities to reflect their value at the reduced corporate tax rate of 21 percent, which resulted in a decrease in income tax expense for the nine months ended March 31, 2018 of approximately \$62 million. The one-time transition tax on previously unremitted foreign earnings and profits resulted in an increase in income tax expense for the nine months ended March 31, 2018 of \$287 million. The Company intends to make the election to pay the one-time transition tax over eight years. The amounts recorded for both the revaluation of certain tax-related assets and liabilities and the one-time transition tax on previously unremitted foreign earnings and profits have been recorded as reasonable estimates based on the Company's analysis. No incremental adjustments have been made to these estimates during the three months ended March 31, 2018, as available information has not significantly changed. The Company continues to gather additional information and interpret the law to complete the accounting for these items.

Certain provisions of the TCJ Act will impact the Company starting in fiscal 2019. These provisions include, but are not limited to, the creation of the base erosion anti-abuse tax, a general limitation of U.S. federal income taxes on dividends from foreign subsidiaries, a new provision designed to tax global intangible low-taxed income, and the repeal of the domestic production activities deduction. The Company continues to evaluate the future impacts of these provisions and, as of March 31, 2018, has not recorded any impact of the TCJ Act aside from those previously mentioned.

The Company and its subsidiaries file income tax returns in the United States and in various foreign jurisdictions. In the normal course of business, the Company is subject to examination by taxing authorities throughout the world. The Company is open to assessment of its federal income tax returns by the U.S. Internal Revenue Service for fiscal years after 2011, and its state and local returns for fiscal years after 2011. The Company is also open to assessment for foreign jurisdictions for fiscal years after 2007. Unrecognized tax benefits reflect the difference between positions taken or expected to be taken on income tax returns and the amounts reflected in the financial statements.

As of March 31, 2018, the Company had gross unrecognized tax benefits of \$156,978. The total amount of gross unrecognized tax benefits that, if recognized, would affect the effective tax rate was \$102,871. If recognized, a significant portion of the gross unrecognized tax benefits would be offset against an asset currently recorded in the Consolidated Balance Sheet. The accrued interest related to the gross unrecognized tax benefits, excluded from the amounts above, is \$19,076. It is reasonably possible that within the next 12 months the amount of gross unrecognized tax benefits could be reduced by up to approximately \$120,000 as a result of the revaluation of existing uncertain tax positions arising from developments in the examination process or the closure of tax statutes. Any increase in the amount of gross unrecognized tax benefits within the next 12 months is expected to be insignificant.

13. Financial instruments

The Company's financial instruments consist primarily of cash and cash equivalents, marketable securities and other investments, accounts receivable and long-term investments as well as obligations under accounts payable, trade, notes payable and long-term debt. Due to their short-term nature, the carrying values for cash and cash equivalents, accounts receivable, accounts payable, trade and notes payable approximate fair value.

Marketable securities and other investments include deposits, which are recorded at cost, and investments classified as available-for-sale, which are recorded at fair value with unrealized gains and losses recorded in accumulated other comprehensive (loss). Gross unrealized gains and losses were not material as of March 31, 2018 and June 30, 2017. There were no facts or circumstances that indicated the unrealized losses were other than temporary.

13. Financial instruments, cont'd

The contractual maturities of available-for-sale investments at March 31, 2018 and June 30, 2017 are as follows:

	March 31, 2018		June 30, 2017	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Less than one year	\$ 1,121	\$ 1,122	\$ 690	\$ 693
One to three years	8,736	8,806	7,865	7,924
Above three years	466	467	2,108	2,113

Actual maturities of available-for-sale investments may differ from their contractual maturities as the Company has the ability to liquidate the available-for-sale investments after giving appropriate notice to the issuer.

The carrying value of long-term debt and estimated fair value of long-term debt are as follows:

	March 31, 2018	June 30, 2017
Carrying value of long-term debt	\$ 5,437,267	\$ 5,383,343
Estimated fair value of long-term debt	5,619,917	5,645,529

The fair value of long-term debt was determined based on observable market prices in the active market in which the security is traded and is classified within level 2 of the fair value hierarchy.

The Company utilizes derivative and non-derivative financial instruments, including forward exchange contracts, costless collar contracts, cross-currency swap contracts and certain foreign denominated debt designated as net investment hedges, to manage foreign currency transaction and translation risk. The derivative financial instrument contracts are with major investment grade financial institutions and the Company does not anticipate any material non-performance by any of the counterparties. The Company does not hold or issue derivative financial instruments for trading purposes.

The Company's EUR 700 million aggregate principal amount of Senior Notes due 2025 have been designated as a hedge of the Company's net investment in certain foreign subsidiaries. The translation of the Senior Notes due 2025 into U.S. dollars is recorded in accumulated other comprehensive (loss) and remains there until the underlying net investment is sold or substantially liquidated.

Derivative financial instruments are recognized on the Consolidated Balance Sheet as either assets or liabilities and are measured at fair value.

The following summarizes the location and fair value of significant derivative financial instruments reported in the Consolidated Balance Sheet as of March 31, 2018 and June 30, 2017:

Balance Sheet Caption	March 31, 2018	June 30, 2017
Net investment hedges		
Cross-currency swap contracts	Other assets \$ —	\$ 15,135
Cross-currency swap contracts	Other liabilities 10,403	—
Cash flow hedges		
Costless collar contracts	Non-trade and notes receivable 1,850	430
Costless collar contracts	Other accrued liabilities 3,557	2,027

The cross-currency swap and costless collar contracts are reflected on a gross basis in the Consolidated Balance Sheet. The Company has not entered into any master netting arrangements.

13. Financial instruments, cont'd

Gains or losses on derivatives that are not hedges are adjusted to fair value through the cost of sales caption in the Consolidated Statement of Income. Gains or losses on derivatives that are hedges are adjusted to fair value through accumulated other comprehensive (loss) in the Consolidated Balance Sheet until the hedged item is recognized in earnings.

The cross-currency swap contracts have been designated as hedging instruments. The costless collar contracts have not been designated as hedging instruments and are considered to be economic hedges of forecasted transactions.

Gains or losses on derivative financial instruments that were recorded in the Consolidated Statement of Income for the three and nine months ended March 31, 2018 and 2017 were not material.

Gain (losses) on derivative and non-derivative financial instruments that were recorded in accumulated other comprehensive (loss) in the Consolidated Balance Sheet are as follows:

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2018	2017	2018	2017
Cross-currency swap contracts	\$ (13,374)	\$ (1,278)	\$ (22,672)	\$ 3,741
Foreign denominated debt	(15,423)	(11,009)	(43,150)	(11,005)

There was no ineffectiveness of the cross-currency swap contracts or foreign denominated debt, nor was any portion of these financial instruments excluded from the effectiveness testing, during the nine months ended March 31, 2018 and 2017.

A summary of financial assets and liabilities that were measured at fair value on a recurring basis at March 31, 2018 and June 30, 2017 are as follows:

Derivatives	16,496	—	16,496	—
Investments measured at net asset value	7,073			
Liabilities:				
Derivatives	16,064	—	16,064	—

13. Financial instruments, cont'd

The fair values of the equity securities, corporate bonds and asset-backed and mortgage-backed securities are determined using the closing market price reported in the active market in which the fund is traded or the market price for similar assets that are traded in an active market.

Derivatives consist of forward exchange, costless collar and cross-currency swap contracts, the fair values of which are calculated using market observable inputs including both spot and forward prices for the same underlying currencies. The calculation of fair value of the cross-currency swap contracts also utilizes a present value cash flow model that has been adjusted to reflect the credit risk of either the Company or the counterparty.

Investments measured at net asset value primarily consist of investments in fixed income mutual funds, which are measured at fair value using the net asset value per share practical expedient. These investments have not been categorized in the fair value hierarchy. The Company has the ability to liquidate these investments after giving appropriate notice to the issuer.

The primary investment objective for all investments is the preservation of principal and liquidity while earning income.

There are no other financial assets or financial liabilities that are marked to market on a recurring basis. Fair values are transferred between levels of the fair value hierarchy when facts and circumstances indicate that a change in the method of estimating the fair value of a financial asset or financial liability is warranted.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FOR THE THREE AND NINE MONTHS ENDED MARCH 31, 2018
AND COMPARABLE PERIODS ENDED MARCH 31, 2017

OVERVIEW

The Company is a leading worldwide diversified manufacturer of motion and control technologies and systems, providing precision engineered solutions for a wide variety of mobile, industrial and aerospace markets.

The Company's order rates provide a near-term perspective of the Company's outlook particularly when viewed in the context of prior and future order rates. The Company publishes its order rates on a quarterly basis. The lead time between the time an order is received and revenue is realized generally ranges from one day to 12 weeks for mobile and industrial orders and from one day to 18 months for aerospace orders. The Company believes the leading economic indicators of these markets that have a strong correlation to the Company's future order rates are as follows:

- Purchasing Managers Index (PMI) on manufacturing activity specific to regions around the world with respect to most mobile and industrial markets;
- Global aircraft miles flown and global revenue passenger miles for commercial aerospace markets and Department of Defense spending for military aerospace markets; and
- Housing starts with respect to the North American residential air conditioning market and certain mobile construction markets.

A PMI above 50 indicates that the manufacturing activity specific to a region of the world in the mobile and industrial markets is expanding. A PMI below 50 indicates the opposite. Recent PMI levels for some regions around the world were as follows:

	March 31, 2018	March 31, 2017	June 30, 2017
United States	59.3	56.6	56.7
Eurozone countries	56.6	56.2	57.4
China	51.0	51.2	50.4
Brazil	53.4	49.6	50.5

Both global aircraft miles flown and available revenue passenger miles increased by approximately six percent from their comparable fiscal 2017 levels. The Company anticipates that U.S. Department of Defense spending with regard to appropriations and operations and maintenance for the U.S. Government's fiscal year 2018 will be approximately two percent higher than the comparable fiscal 2017 level.

Housing starts in March 2018 were approximately 11 percent higher than housing starts in March 2017 and approximately nine percent higher than housing starts in June 2017.

The Company believes many opportunities for profitable growth are available. The Company intends to focus primarily on business opportunities in the areas of energy, water, food, environment, defense, life sciences, infrastructure and transportation. The Company believes it can meet its strategic objectives by:

- Serving the customer and continuously enhancing its experience with the Company;
- Successfully executing its Win Strategy initiatives relating to premier customer service, financial performance and profitable growth;
- Maintaining its decentralized division and sales company structure;
- Fostering a safety first and entrepreneurial culture;
- Engineering innovative systems and products to provide superior customer value through improved service, efficiency and productivity;
- Delivering products, systems and services that have demonstrable savings to customers and are priced by the value they deliver;
- Acquiring strategic businesses;
- Organizing around targeted regions, technologies and markets;
- Driving efficiency by implementing lean enterprise principles; and
- Creating a culture of empowerment through its values, inclusion and diversity, accountability and teamwork.

Acquisitions will be considered from time to time to the extent there is a strong strategic fit, while at the same time, maintaining the Company's strong financial position. In addition, the Company will continue to assess its existing businesses and initiate efforts to divest businesses that are not considered to be a good long-term strategic fit for the Company. Future business divestitures could have a negative effect on the Company's results of operations.

The discussion below is structured to separately discuss the Consolidated Statement of Income, Results by Business Segment, Consolidated Balance Sheet and Consolidated Statement of Cash Flows.

CONSOLIDATED STATEMENT OF INCOME

(dollars in millions)	Three Months Ended March 31,		Nine Months Ended March 31,	
	2018	2017	2018	2017
Net sales	\$ 3,749.6	\$ 3,119.1	\$ 10,484.9	\$ 8,533.1

Selling, general and administrative expenses, as a percent of sales	11.2%	12.6%	11.8%	12.3%
Interest expense	\$ 54.1	\$ 42.1	\$ 160.8	\$ 109.6
Other (income), net	\$ (20.0)	\$ (13.8)	\$ (42.0)	\$ (90.5)
Effective tax rate	22.1%	24.2%	41.2%	25.6%
Net income	\$ 366.1	\$ 238.8	\$ 708.0	\$ 690.5
Net income, as a percent of sales	9.8%	7.7%	6.8%	8.1%

Net sales for the current-year quarter and first nine months of fiscal 2018 increased as compared to the prior-year comparable periods primarily due to higher sales in both the Diversified Industrial North American and Diversified Industrial International businesses. The effect of currency rate changes increased net sales by approximately \$136 million in the current-year quarter (\$127 million of which was attributable to the Diversified Industrial International businesses) and \$264 million for the first nine months of fiscal 2018 (\$239 million of which was attributable to the Diversified Industrial International businesses). Acquisitions made in the last 12 months contributed approximately \$233 million and \$970 million in sales in the current-year quarter and first nine months of fiscal 2018, respectively.

Gross profit margin (calculated as net sales minus cost of sales, divided by net sales) increased in the current-year quarter and the first nine months of fiscal 2018 primarily due to higher margins in the Aerospace Systems Segment, partially offset by lower margins in the Diversified Industrial Segment (refer to "Results by Business Segment" for further discussion). Pension cost included in cost of sales for the current-year quarter and prior-year quarter were \$20.0 million and \$34.6 million, respectively, and \$64.2 million and \$101.8 million for the first nine months of fiscal 2018 and 2017, respectively. Cost of sales for the current-year quarter and prior-year quarter also included business realignment charges and acquisition integration costs of \$9.5 million and \$10.3 million, respectively, and \$32.3 million and \$25.0 million for the first nine months of fiscal 2018 and 2017, respectively.

Selling, general and administrative expenses increased for the current-year quarter and the first nine months of fiscal 2018 primarily due to higher amortization expense resulting from recent acquisitions, higher sales expenses resulting from the increase in sales, and higher incentive compensation. Selling, general and administrative expenses for the current-year quarter also reflect higher deferred compensation expense compared to the prior-year quarter. Pension cost included in selling, general and administrative expenses for the current-year quarter and prior-year quarter were \$9.2 million and \$16.4 million, respectively, and \$27.7 million and \$48.6 million for the first nine months of fiscal 2018 and 2017, respectively. Selling, general and administrative expenses for the current-year quarter and prior-year quarter also included business realignment charges and acquisition integration costs of \$7.7 million and \$6.0 million, respectively, and \$24.4 million and \$10.0 million for the first nine months of fiscal 2018 and 2017, respectively.

Interest expense for the current-year quarter increased primarily due to higher weighted-average borrowings. Interest expense for the first nine months of fiscal 2018 increased primarily due to both higher weighted-average borrowings and higher weighted-average interest rates.

Other (income), net in the current-year quarter and the first nine months of fiscal 2018 includes income of \$15.9 million and \$34.4 million, respectively, related to equity method investments compared to income of \$10.9 million and \$30.0 million for the prior-year quarter and first nine months of fiscal 2017, respectively. Other (income), net in the first nine months of fiscal 2018 includes a writedown of an investment of approximately \$20.0 million, a loss of approximately \$13.8 million on the sale of an investment and a gain on the sale of real estate of approximately \$28.4 million. Other (income), net includes a gain of approximately \$45 million in the first nine months of fiscal 2017 related to the sale of a product line.

Effective tax rate for the current-year quarter of fiscal 2018 was lower than the prior-year quarter primarily due to the reduced U.S. income tax rate resulting from enactment of the TCJ Act. The effective tax rate for the first nine months of fiscal 2018 was higher than the comparable prior-year period primarily due to the impact of one-time adjustments recorded as a result of the TCJ Act. See Note 12 to the Consolidated Financial Statements for further discussion of the impact of the TCJ Act. Excluding the impact of the TCJ Act one-time adjustments, the effective tax rate for the first nine months of fiscal 2018 was lower primarily due to the reduced U.S. income tax rate resulting from enactment of the TCJ Act and a net increase in discrete tax benefits, partially offset by an increase in taxes related to international activities. The Company expects the fiscal 2018 effective tax rate will be approximately 37 percent. The impact on the fiscal 2018 effective tax rate of the TCJ Act one-time adjustments is approximately 13 percent.

RESULTS BY BUSINESS SEGMENT

Diversified Industrial Segment

Backlog	\$ 2,285.8	\$ 1,969.1	\$ 2,285.8	\$ 1,969.1

The Diversified Industrial Segment operations experienced the following percentage changes in net sales in the current-year period versus the comparable prior-year period:

	Period Ending March 31, 2018	
	Three Months	Nine Months
Diversified Industrial North America – as reported	24.7%	33.0%
Acquisitions	13.8%	21.6%
Currency	0.5%	0.6%
Diversified Industrial North America – without acquisitions and currency	10.4%	10.8%
Diversified Industrial International – as reported	23.1%	23.3%
Acquisitions	3.3%	5.5%
Currency	11.2%	7.6%
Diversified Industrial International – without acquisitions and currency	8.6%	10.2%
Total Diversified Industrial Segment – as reported	24.0%	28.5%
Acquisitions	9.2%	14.2%
Currency	5.3%	3.8%
Total Diversified Industrial Segment – without acquisitions and currency	9.5%	10.5%

The above presentation reconciles the percentage changes in net sales of the Diversified Industrial Segment reported in accordance with U.S. GAAP to percentage changes in net sales adjusted to remove the effects of acquisitions made within the prior four fiscal quarters as well as the effects of currency exchange rates (a non-GAAP measure). The effects of acquisitions and currency exchange rates are removed to allow investors and the Company to meaningfully evaluate the percentage changes in net sales on a comparable basis from period to period.

Excluding the effects of acquisitions and changes in currency exchange rates, Diversified Industrial North American sales increased for the current-year quarter and first nine months of fiscal 2018 primarily due to higher demand from distributors and end-users in most markets. The markets that experienced the largest increase in end-user demand were the construction equipment, oil and gas, cars and light trucks, heavy-duty truck, farm and agricultural equipment and engines markets. Higher demand was also experienced in the industrial machinery market for the first nine months of fiscal 2018. Excluding the effects of acquisitions and changes in currency exchange rates, Diversified Industrial International sales for the current-year quarter and the first nine months of fiscal 2018 increased primarily due to higher volume in all regions. The Asia Pacific region accounted for approximately 46 percent and 51 percent of the sales increase for the current-year quarter and first nine months of fiscal 2018, respectively, and Europe accounted for approximately 45 percent and 42 percent of the sales increase for the

current-year quarter and first nine months of fiscal 2018, respectively. Within the Asia Pacific region, the largest increase in sales for both the current-year quarter and first nine months of fiscal 2018 was experienced from distributors and end-users in the construction equipment and semiconductor markets. An increase in sales was also experienced in the industrial machinery, engines, and cars and light trucks markets for the first nine months of fiscal 2018. Within Europe, distributors and end-users in the mining, construction equipment, oil and gas, heavy-duty truck, machine tools, industrial material handling, industrial machinery and off-highway forestry markets experienced the largest increase in sales during both the current-year quarter and first nine months of fiscal 2018.

Operating margins in the Diversified Industrial North American businesses for the current-year quarter and first nine months of fiscal 2018 were lower as the impact of the higher sales volume and lower operating expenses resulting from prior-year restructuring activities and the Company's simplification initiative were more than offset by higher amortization expense, the effect of the operations of CLARCOR, Inc. (Clarcor) not being fully integrated and unfavorable raw material prices.

The increase in operating margins in the Diversified Industrial International businesses for the current-year quarter and first nine months of fiscal 2018 was primarily due to the higher sales volume and lower operating expenses resulting from prior-year restructuring activities and the Company's simplification initiative, resulting in manufacturing efficiencies, partially offset by higher amortization expense, an unfavorable product mix and unfavorable raw material prices.

The following business realignment expenses and acquisition integration costs are included in Diversified Industrial North American and Diversified Industrial International operating income:

(dollars in millions)	Three Months Ended March 31,		Nine Months Ended March 31,	
	2018	2017	2018	2017
Diversified Industrial North America	\$ 8.4	\$ 4.0	\$ 29.2	\$ 10.0
Diversified Industrial International	7.2	10.6	24.4	22.1

The business realignment charges primarily consist of severance costs related to actions taken under the Company's simplification initiative implemented by operating units throughout the world as well as plant closures. The majority of the Diversified Industrial International business realignment charges were incurred in Europe. The Company anticipates that cost savings realized from the work force reduction measures taken in the first nine months of fiscal 2018 will not materially impact operating income in fiscal 2018 and will increase operating income in fiscal 2019 by approximately three percent in both the Diversified Industrial North American operations and Diversified Industrial International operations. Acquisition integration costs primarily relate to the integration of the fiscal 2017 acquisition of Clarcor and are primarily incurred in the Diversified Industrial North American businesses. The Company expects to continue to take the actions necessary to structure appropriately the operations of the Diversified Industrial Segment. Such actions are expected to result in approximately \$40 million of additional business realignment charges and acquisition integration costs in the remainder of fiscal 2018.

Diversified Industrial Segment backlog increased from the prior-year quarter and the June 30, 2017 amount of \$2,041.4 million primarily due to orders exceeding shipments in both the Diversified Industrial North American and Diversified Industrial International businesses. The percentage increase in backlog from the prior-year quarter was experienced relatively evenly between North America, Europe and Asia Pacific. Of the increase in backlog from June 30, 2017, approximately 30 percent was experienced in North America, approximately 25 percent was experienced in Europe and approximately 40 percent was experienced in the Asia Pacific region. Backlog consists of written firm orders from a customer to deliver products and, in the case of blanket purchase orders, only includes the portion of the order for which a schedule or release date has been agreed to with the customer. The dollar value of backlog is equal to the amount that is expected to be billed to the customer and reported as a sale. The Company anticipates Diversified Industrial North American sales for fiscal 2018 will increase between 24 percent and 26 percent from their fiscal 2017 level and Diversified Industrial International sales for fiscal 2018 will increase between 19 percent and 21 percent from their fiscal 2017 level. The primary driver for the increase in sales in fiscal 2018 is expected to be the sales contribution from fiscal 2017 acquisitions. Diversified Industrial North American operating margins in fiscal 2018 are expected to range from 15.9 percent to 16.1 percent and Diversified Industrial International operating margins in fiscal 2018 are expected to range from 14.2 percent to 14.4 percent.

Aerospace Systems Segment

(dollars in millions)	Three Months Ended March 31,		Nine Months Ended March 31,	
	2018	2017	2018	2017
Net sales	\$ 598.4	\$ 577.0	\$ 1,679.3	\$ 1,682.0
Operating income	\$ 106.7	\$ 80.0	\$ 271.2	\$ 225.8
Operating margin	17.8%	13.9%	16.2%	13.4%
Backlog	\$ 1,981.7	\$ 1,695.2	\$ 1,981.7	\$ 1,695.2

The increase in net sales in the Aerospace Systems Segment for the current-year quarter was primarily due to higher volume in the commercial original equipment manufacturer (OEM) and military businesses as well as the commercial and military aftermarket businesses. The decrease in net sales for the first nine months of fiscal 2018 was primarily due to lower commercial and military OEM volume, partially offset by higher volume in the commercial and military aftermarket businesses. The higher operating margin for the current-year quarter was primarily due to higher aftermarket volume and profitability, favorable contract settlements when compared to the prior-year quarter, lower operating expenses and lower engineering development costs. The higher operating margin for the first nine months of fiscal 2018 was primarily due to favorable aftermarket to OEM product mix, higher aftermarket profitability, lower operating expenses and lower engineering development costs and favorable contract settlements when compared to the first nine months of fiscal 2017.

The increase in backlog from the prior-year quarter and the June 30, 2017 amount of \$1,753.0 million is primarily due to orders exceeding shipments in both the commercial and military OEM businesses and the military aftermarket business, partially offset by shipments exceeding orders in the commercial aftermarket business. Backlog consists of written firm orders from a customer to deliver products and, in the case of blanket purchase orders, only includes the portion of the order for which a schedule or release date has been agreed to with the customer. The dollar value of backlog is equal to the amount that is expected to be billed to the customer and reported as a sale. For fiscal 2018, sales are expected to range from being flat to increasing two percent from the fiscal 2017 level and operating margins are expected to range from 16.4 percent to 16.6 percent. A higher concentration of commercial OEM volume in future product mix and higher than expected new product development costs could result in lower margins.

Corporate general and administrative expenses

Corporate general and administrative expenses were \$54.1 million in the current-year quarter compared to \$45.7 million in the comparable prior-year quarter and were \$142.4 million for the first nine months of fiscal 2018, compared to \$120.7 million for the first nine months of fiscal 2017. As a percent of sales, corporate general and administrative expenses were 1.4 percent in the current-year quarter and 1.5 percent in the prior-year quarter and were 1.4 percent of sales in both first nine months of fiscal 2018 and first nine months of fiscal 2017. The primary drivers for the change in corporate general and administrative expenses between the current-year quarter and the first nine months of 2018 as compared to the respective prior-year periods were expenses associated with the Company's incentive and deferred compensation programs.

Other expense (income) (in the Results By Business Segment) included the following:

(dollars in millions)	Three Months Ended March 31,		Nine Months Ended March 31,	
	2018	2017	2018	2017
Expense (income)				
Foreign currency transaction	\$ 3.9	\$ 7.0	\$ 16.5	\$ 6.2
Stock-based compensation	8.1	8.4	43.5	43.6
Pensions	5.1	19.5	17.9	59.9
Divestitures and asset sales and writedowns	0.3	1.0	(25.9)	(43.5)
Sale and writedown of investments	—	—	33.8	—
Acquisition expenses	1.7	20.5	4.3	36.6
Other items, net	(4.6)	1.1	(2.1)	(5.7)
	\$ 14.5	\$ 57.5	\$ 88.0	\$ 97.1

Foreign currency transaction primarily relates to the impact of changes in foreign exchange rates on cash, marketable securities and other investments and intercompany transactions. The lower pension expense is primarily due to a lower level of amortization of past actuarial losses.

CONSOLIDATED BALANCE SHEET

(dollars in millions)	March 31, 2018	June 30, 2017
Cash	\$ 1,190.7	\$ 924.2
Trade accounts receivable, net	2,146.4	1,930.8
Inventories	1,732.8	1,549.5
Shareholders' equity	5,870.4	5,261.6
Working capital	\$ 2,054.6	\$ 1,383.9
Current ratio	1.59	1.41

Cash (comprised of cash and cash equivalents and marketable securities and other investments) includes \$1,096 million and \$874 million held by the Company's foreign subsidiaries at March 31, 2018 and June 30, 2017, respectively. As a result of the TCJ Act, the prior worldwide tax system was replaced by a territorial tax system, which generally allows companies to repatriate future foreign source earnings without incurring additional U.S. Federal taxes. However, other U.S. or foreign taxes may be incurred should cash be remitted between the Company's subsidiaries. The Company has historically considered the earnings in the Company's non-U.S. subsidiaries to be indefinitely reinvested. The Company is currently analyzing this position given the enactment of the TCJ Act.

Trade accounts receivable, net are receivables due from customers for sales of product. Days sales outstanding relating to trade accounts receivable was 52 days at March 31, 2018, and 51 days at June 30, 2017. The Company believes that its receivables are collectible and appropriate allowances for doubtful accounts have been recorded.

Inventories as of March 31, 2018 increased \$183 million primarily due to an increase in inventories in the Diversified Industrial Segment as well as the effect of foreign currency translation (which accounted for an increase of \$40 million). Approximately 57 percent of the increase in inventories was experienced in the Diversified Industrial North American businesses and approximately 41 percent of the increase in inventories was experienced in the Diversified Industrial International businesses. Days supply of inventory was 67 days at March 31, 2018, 67 days at June 30, 2017 and 69 days at March 31, 2017.

Shareholders' equity activity during the first nine months of fiscal 2018 included a decrease of approximately \$150 million as a result of share repurchases and an increase of approximately \$194 million as a result of foreign currency translation.

CONSOLIDATED STATEMENT OF CASH FLOWS

(dollars in millions)	Nine Months Ended March 31,	
	2018	2017
Cash provided by (used in):		
Operating activities	\$ 904.8	\$ 789.3
Investing activities	(183.0)	(3,308.4)
Financing activities	(535.5)	2,168.4
Effect of exchange rates	18.3	(51.4)
Net increase (decrease) in cash and cash equivalents	\$ 204.6	\$ (402.1)

Cash flows provided by operating activities for the first nine months of fiscal 2018 was higher than the first nine months of fiscal 2017 primarily due to an increase in the amount of adjustments to reconcile net income to net cash from operating activities and the absence of a \$220 million voluntary cash contribution made to the Company's domestic qualified pension plan made in the first nine months of fiscal 2017, partially offset by an increase in cash used for working capital items. The Company continues to focus on managing its inventory and other working capital requirements.

Cash flows used in investing activities includes net maturities (purchases) of marketable securities and other investments of \$(58) million and \$813 million in the first nine months of fiscal 2018 and first nine months of fiscal 2017, respectively. Cash flows used in investing activities included \$4,068 million for acquisitions in the first nine months of fiscal 2017. No acquisitions were made during the first nine months of fiscal 2018.

Cash flows provided by financing activities for the first nine months of fiscal 2018 included \$54 million of net commercial paper repayments versus \$448 million of net commercial paper borrowings in the first nine months of fiscal 2017. Cash flows provided by financing activities includes repurchase activity under the Company's share repurchase program. The Company repurchased 0.8 million common shares for \$150 million in the first nine months of fiscal 2018 as compared to the repurchase of 1.7 million common shares for \$215 million in the first nine months of fiscal 2017.

The Company's goal is to have no less than an "A" rating on senior debt to ensure availability and reasonable cost of external funds. In periods following significant capital deployment, including for share repurchases or acquisitions, certain of the ratings assigned to the Company's senior debt may be, and at March 31, 2018 was, lower than the stated goal. The Company does not presently believe that its ability to borrow funds in the future at desirable tenors and affordable interest rates will be impacted if certain of its ratings are temporarily below an "A" level at the time of such borrowings. At March 31, 2018, the long-term credit ratings assigned to the Company's senior debt securities by the credit rating agencies engaged by the Company were as follows:

Fitch Ratings	A-
Moody's Investor Services, Inc.	Baa1
Standard & Poor's	A

At March 31, 2018, the Company had a line of credit totaling \$2,000 million through a multi-currency revolving credit agreement with a group of banks, \$1,526 million of which was available. The credit agreement expires in October 2021; however, the Company has the right to request a one-year extension of the expiration date on an annual basis, which request may result in changes to the current terms and conditions of the credit agreement. Advances from the credit agreement can be used for general corporate purposes, including acquisitions, and for the refinancing of existing indebtedness. The credit agreement requires the payment of an annual facility fee, the amount of which may increase in the event the Company's credit ratings are lowered. Although a lowering of the Company's credit ratings would likely increase the cost of future debt, it would not limit the Company's ability to use the credit agreement nor would it accelerate the repayment of any outstanding borrowings.

As of March 31, 2018, the Company was authorized to sell up to \$2,000 million of short-term commercial paper notes. As of March 31, 2018, \$474 million of commercial paper notes were outstanding and the largest amount of commercial paper notes outstanding during the current-year quarter was \$673 million.

The Company's credit agreements and indentures governing certain debt securities contain various covenants, the violation of which would limit or preclude the use of the credit agreements for future borrowings, or might accelerate the maturity of the related outstanding borrowings covered by the indentures. Based on the Company's rating level at March 31, 2018, the most restrictive financial covenant provides that the ratio of debt to debt-shareholders' equity cannot exceed .60 to 1.0. At March 31, 2018, the Company's debt to debt-shareholders' equity ratio was .502 to 1.0. The Company is in compliance with all covenants and expects to remain in compliance during the term of the credit agreements and indentures.

FORWARD-LOOKING STATEMENTS

Forward-looking statements contained in this and other written and oral reports are made based on known events and circumstances at the time of release, and as such, are subject in the future to unforeseen uncertainties and risks. All statements regarding future performance, earnings projections, events or developments are forward-looking statements. It is possible that the future performance and earnings projections of the Company, including its individual segments, may differ materially from current expectations, depending on economic conditions within its mobile, industrial and aerospace markets, and the Company's ability to maintain and achieve anticipated benefits associated with announced realignment activities, strategic initiatives to improve operating margins, actions taken to combat the effects of the current economic environment, and growth, innovation and global diversification initiatives. Additionally, the actual impact of the U.S. Tax Cuts and Jobs Act may affect future performance and earnings projections as the amounts reflected in this period are preliminary estimates and exact amounts will not be determined until a later date, and there may be other judicial or regulatory interpretations of the U.S. Tax Cuts and Jobs Act that may also affect these estimates and the actual impact on the Company. A change in the economic conditions in individual markets may have a particularly volatile effect on segment performance.

Among other factors which may affect future performance are:

- changes in business relationships with and purchases by or from major customers, suppliers or distributors, including delays or cancellations in shipments;
- disputes regarding contract terms or significant changes in financial condition, changes in contract cost and revenue estimates for new development programs, and changes in product mix;
- ability to identify acceptable strategic acquisition targets; uncertainties surrounding timing, successful completion or integration of acquisitions and similar transactions, including the integration of Clarcor; ability to successfully divest businesses planned for divestiture and realize the anticipated benefits of such divestitures;
- the determination to undertake business realignment activities and the expected costs thereof and, if undertaken, the ability to complete such activities and realize the anticipated cost savings from such activities;
- ability to implement successfully the capital allocation initiatives, including timing, price and execution of share repurchases;
- availability, limitations or cost increases of raw materials, component products and/or commodities that cannot be recovered in product pricing;
- ability to manage costs related to insurance and employee retirement and health care benefits;
- compliance costs associated with environmental laws and regulations;
- potential labor disruptions;
- threats associated with and efforts to combat terrorism and cyber-security risks;
- uncertainties surrounding the ultimate resolution of outstanding legal proceedings, including the outcome of any appeals;
- global competitive market conditions, including global reactions to U.S. trade policies, and resulting effects on sales and pricing; and
- global economic factors, including manufacturing activity, air travel trends, currency exchange rates, difficulties entering new markets and general economic conditions such as inflation, deflation, interest rates and credit availability.

The Company makes these statements as of the date of this disclosure, and undertakes no obligation to update them unless otherwise required by law.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company manages foreign currency transaction and translation risk by utilizing derivative and non-derivative financial instruments, including forward exchange contracts, costless collar contracts, cross-currency swap contracts and certain foreign denominated debt designated as net investment hedges. The derivative financial instrument contracts are with major investment grade financial institutions and the Company does not anticipate any material non-performance by any of the counterparties. The Company does not hold or issue derivative financial instruments for trading purposes.

Derivative financial instruments are recognized on the Consolidated Balance Sheet as either assets or liabilities and are measured at fair value. Further information on the fair value of these contracts is provided in Note 13 to the Consolidated Financial Statements. Gains or losses on derivatives that are not hedges are adjusted to fair value through the Consolidated Statement of Income. Gains or losses on derivatives that are hedges are adjusted to fair value through accumulated other comprehensive (loss) in the Consolidated Balance Sheet until the hedged item is recognized in earnings. The translation of the foreign denominated debt that has been designated as a net investment hedge is recorded in accumulated other comprehensive (loss) and remains there until the underlying net investment is sold or substantially liquidated.

The Company's debt portfolio contains variable rate debt, inherently exposing the Company to interest rate risk. The Company's objective is to maintain a 60/40 mix between fixed rate and variable rate debt thereby limiting its exposure to changes in near-term interest rates.

ITEM 4. CONTROLS AND PROCEDURES

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's principal executive officer and principal financial officer, of the effectiveness of the Company's disclosure controls and procedures as of March 31, 2018. Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that, as of March 31, 2018, the Company's disclosure controls and procedures were effective.

There was no change in the Company's internal control over financial reporting during the quarter ended March 31, 2018 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
